

Bladder & Bowel Community

The Bladder and Bowel Community (B&BC) is dedicated to helping people manage their continence needs as a result of both bladder and bowel control problems. The organisation aims to raise awareness of these often hidden conditions and provide information and advice services for individuals, patients and health professionals.

B&BC campaigns for better services, treatments and products by working with researchers, individuals and related organisations, and will work towards delivering the kind of services that meet the needs of people affected by these conditions.

For details on local continence services please contact the B&BC office.
